**Subject:** Feedback - clarification on some points

Hi Neeyati,

Thank you for the detailed feedback.

I wanted to understand the expectations behind the following feedback points a bit more, so that I can rework things properly.

### **Implementation section**

*The Implementation section needs to be completely revised. This section should describe what I personally worked on and implemented during the project, rather than explaining how the overall product or project is structured. I should use first-person language such as "I worked on...", "I developed...", "I implemented...", "I configured...", and "I added..."*

Did you want me to remove the architecture diagrams and other process diagrams for this? I created that documentation as work on the project itself, which I built from scratch. Only one of the projects — the RPA LLM bot — is an existing project that I took on to improve, so I can remove the extra diagrams there. However, my task was to first understand how the repo works so that I could work on it, and as part of that understanding, I created documentation for the existing project before starting my own work on it.

**The Diagrams look great and should be kept. However, the language and the tone of the section needs to change.**

### **Weekly Implementation section**

*The Weekly Implementation section needs significant expansion. Each week should contain approximately one full page of detailed content describing the work completed. A single paragraph for an entire week is not sufficient.*

For weeks 1–4, we only worked part-time (as instructed by Dr. Pawan, since courses were running until mid-April), so the worklogs — and correspondingly the implementation pages — for those weeks are shorter (2-3 days work 5-6 hours). From week 5 onwards, I have about 1–1.5 pages of content. Could you please advise whether I should consolidate weeks 1–2 and weeks 3–4 into one page of content each? If content of later weeks (from week5) is also not sufficient, I can always add more content.

**There is no need to consolidate but a better detailed description of the work would be great. I believe it is still possible to fill up one page with part time work of a week.**

### **Work Logs**

*In the Work Logs, some of the later weeks contain tasks of approximately seven hours that are summarized in only one or two lines. Any task lasting more than four hours should be broken down into smaller, realistic time blocks, with a more detailed description of the work completed during each block.*

Could you clarify which later weeks you meant here — weeks 24/25? Those were indeed short, since the week was still in progress, so I only submitted generic two days of work for week 24, and week 25 will be completed tomorrow, August 31st, so I'll only have one day of content for it. Should I consolidate that with week 24? What's the expectation here?

**I was referring to week 4-5 and onwards here.**

Please let me know. Other formattign parts, I will do as instructed. Thank you.
