

About Small Project report

This report is prepared by Evgeny Chudaev, an MSCDA student at Saint Mary's University, to fulfill the requirements of the small project component of this graduate program.

I started the 200-hour project in early August and completed it in late September. I have prepared a comprehensive narrative detailing each activity undertaken during the project which includes a structured breakdown of the tools, software solutions, and methodologies incorporated throughout its duration. Furthermore, I have elaborated on the scope and nature of my responsibilities and involvement within the organization during this period.

In my internship report, I have documented all stages of the project starting with ideation, development, and deployment. It doesn't stop there; the report also delves into the challenges that arose, and the potential avenues of opportunity that this project has opened up for future endeavors. For those keen on understanding the intricacies, the project log offers a deep dive into activities and their corresponding phases.

The project has resulted in tangible assets generated for my organization, Emera Inc. Through this project, I have gained valuable insights into the practical application of Machine Learning by addressing real-world business challenges. I have also gained a deeper understanding of the strengths and limitations of various Machine Learning algorithms when applied to different business problems.

As we continue this journey, the early support and enthusiasm from my colleagues and leaders serve as a constant source of motivation. Their belief in the vision has laid a strong foundation for a future where our organization not only adapts to the rapidly changing technological landscape but thrives within it.

The report was written entirely by me without the support of any third parties or productivity tools, like ChatGPT. It has been gradually written as my project progressed over the last 2 months.

APPENDIX

Supervisor Submission Feedback

Date	Grade	Feedback
20-Oct-2023	90%	Note: Please make final submission by adding this feedback to the cover letter for our records. Excellent project. You have used this opportunity to get additional data analytics experience. Nikita could have given you access to one of the servers for training. I am submitting your grades for 5585 and 5586. There is no rush with registrar audit as your 5530 grade will be pending.

Mentor Submission Feedback

Date	Grade	Feedback
19-Oct-2023	80%	Hello Evgeny, Score : 80/100 Please copy my complete feedback as it is in the cover letter, its only half right now. I am going to open supervisor submission for you. Please follow the following instructions carefully before making a supervisor submission as Dr. Lingras does not like incomplete or careless submissions : 1. You will submit the final 5 files to Dr. Lingras that were approved by me : 1. Cover letter (including an appendix containing my complete feedback history, add this feedback too that marks you grade 80 or above) as a PDF. 2. Project report - Word format. 3. Project Report - PDF format. 4. Logs - Excel sheet. 5. Logs - PDF copy.

		2. In the comments while making a submission let him know you went in multiple iterations with me and state the number of submissions and score on every submission. 3. Let him know in the last line you went to writing centre and the details of visit that includes date, time and person you worked with. (If visited) All the best! :)
15-Oct-2023	65%	Please label all the figures with figure numbers and short description. Same with tables, need to number the table. I also would like to see a bit of space between first letter of the sentence, it's kind of overlapping now. Also, in implementation section, could you make sure everything is first form, "I implemented", "I did" currently first line is first form but later the elaborations are not in first form. I am sure Dr.Lingras will point this out. The cover letter is too short, look at sample attached. The logs won't be approved, too short details, very raw. Look at sample attached.
8-Oct-2023	N/A	Hey Evgeny, Thank you but please make complete submission for me to evaluate to respect mine and your time. It can wait a week. Thanks!
