

Respected Committee Members,

I am honored to present my meticulously crafted internship report, which encapsulates an insightful narrative of my journey, experiential acquisitions, and consequential contributions during my tenure as an ML Engineer at Lifesight Technologies. This report provides a comprehensive overview of my achievements, profound insights, and prospects, all situated within the domains of advanced machine learning, e-commerce analytics, and artificial intelligence.

Commencing on the 25th of April 2023, my internship spanned a significant period in which I was privileged to be an integral part of the Lifesight Technologies team. I collaborated harmoniously with a dynamic and dedicated group, collectively committed to exploring the frontiers of AI technology. In my capacity as an ML Engineer, I ardently embraced the pivotal role of conceptualizing, developing, and deploying intricate machine learning models to yield profound analytical insights from e-commerce data.

At the core of this report lies the intricate tapestry of the project's scope, a fabric interwoven with the creation of predictive algorithms to decode customer behaviour, prognosticate sales trends, and seamlessly integrate advanced language models. This undertaking was underpinned by my personal learning aspirations, which encompassed the mastery of intricate machine learning techniques, adeptness in data analytics, adept utilization of cloud computing, and the fostering of harmonious cross-functional collaboration.

Diligently chronicled in the report are the challenges I encountered and surmounted. Each obstacle presented an occasion not only to transcend constraints but also to espouse innovative methodologies. Navigating the complexities of advanced machine learning algorithms, effecting the seamless amalgamation of language models, and nurturing interdisciplinary synergy were transformative moments, elevating my professional maturation.

It is with a profound sense of accomplishment that I present this report, a testament to the milestones realized throughout my internship journey. It signifies my unwavering commitment to the overarching mission of Lifesight Technologies: the harnessing of AI to catalyse transformative shifts within the realm of e-commerce analytics. As an ML Engineer, I have been bestowed with a role that significantly contributed to the development of predictive models, thus paving the way for heightened customer engagement, data-driven decision-making, and innovative breakthroughs within the organizational fabric. Also, ChatGPT and tools like Grammarly helped in correcting and solidifying context written in this report.

I extend my heartfelt gratitude to Dr. Pawan Lingras and the entire Lifesight Technologies fraternity for orchestrating an immersive learning environment, and for affording me a platform to translate theoretical knowledge into pragmatic solutions. Your sagacious guidance, unwavering support, and mentoring have been seminal in shaping my professional odyssey during this internship.

I wholeheartedly appreciate your discerning consideration of my internship report, an embodiment of my unwavering pursuit of excellence, innovation, and perpetual learning. I eagerly anticipate the privilege of engaging in constructive discourse pertaining to any feedback, insights, or avenues for potential collaboration that may ensue from the contemplation of this report.

With the utmost sincerity,

Piyush Priyam

ML Engineer

Lifesight Technologies

Appendix

Date	Submission	Feedback	Score
Sep 6, 2023	Submission 7	Hello Piyush, I am going to open supervisor submission for you. Please follow the following instructions carefully before making a supervisor submission as Dr. Lingras does not like incomplete or careless submissions: 1. You will submit the final 5 files to Dr. Lingras that were approved by me: 1. Cover letter (including an appendix containing my complete feedback history, add this feedback too that marks you grade 80 or above) as a PDF. 2. Internship report - Word format. 3. Internship Report - PDF format. 4. Logs - Excel sheet. 5. Logs - PDF copy. 2. In the comments while making a submission let him know you went in multiple iterations with me and state the number of submissions and score on every submission. 3. Let him know in the last line you went to writing centre and the details of visit that includes date, time and person you worked with. (If visited) All the best! :)	80

Sep 3, 2023	Submission 6	Hello Piyush, I am happy with the updated report. You did spend good effort on it. Just a quick thing I see is this weird dark cursor point - both is word and pdf versions. Can you check in MS word and pdf. Pointing it out before Dr. Lingras does. Once you check and fix that: Create an appendix section in your cover letter and copy paste MY entire feedback here of all submissions including scores including this. (As it is, latest feedback on top) Please follow the following instructions carefully as Dr. Lingras does not like incomplete or careless submissions. You have to submit 5 files for supervisor submission: 1. Cover letter (including an appendix containing my complete feedback history) as a PDF. 2. Internship report - Word format. 3. Internship Report - PDF format. 4. Logs - Excel sheet. 5. Logs - PDF copy. Instruction from Dr. Lingras and committee: "If we do not see the five files as described. We will reject the report without reading." Submit the files to me for final review and then we will go for next steps.	78
Aug 31, 2023	Submission 5	Hello Piyush, Most of the updates look good. My only concern is the gaps and non-uniform spacing that Dr. Lingras will point out. 1. The headings should start right after other than leaving such gaps, could you please fix this and make sure it's fixed throughout. 2. Could you also see samples and check how the spacings are uniform. 1 table per page just increases the readability time, needs to be fixed. 3. Also, the heading and its subtext should be on same page. Please make sure this is followed throughout. Move the heading to next page.	65
Aug 22, 2023	Submission 4	Hello Piyush, The updates look good. Here are a few more things I would like to point: 1. Please add prefixes to all the names in the report including the cover page. 2. The tasks above 10 hours needs to be split irrespective of the details you have given. Please split it may be like 8 hours. 3. On page 111, as a result is on different page than the sub text. Make sure they are on same page. The heading and sub text should be on same page, I am sure Dr. Lingras will point this out. 4. There are a lot of gaps in between text in the chronological timeline, can those gaps be removed, it adds a lot of space and makes it a long read. 5. Cover letter still does not talk about ChatGPT. Comment: Can the description be more elaborative as full sentences than points. I feel Dr. Lingras will definitely point this out. I am looking for something detailed like a paragraph. Do you think you can update like that?	60

Aug 14, 2023	Submission 3	Hello Piyush, Chronological timeline should not have 1.5 spacing that's what I stated in my following feedback. Please remove the spacing. "Leaving Chronological timeline, please make sure the size of all other sub text is 12 (headings -20). Also, give a spacing of 1.5 throughout the report leaving chronological timeline." Please send me a meeting invite for 9 am ADT - August 15 if that works for you. We will need a call to discuss. Meeting notes: 1. Correcting the formatting. 2. Updating chronological timeline as per sample - use ChatGPT for help. 3. Moving timesheet to conclusion after skills learnt. 4. Adding a goals review table in conclusion before timesheet. 5. Renaming the logs file. 6. Add day of week to the work log after date. (Please add date and full days to the logs before task) 7. After all these changes: 1. Passing report through Grammarly. 2. Write a detailed description on all my points about how you addressed all my feedback, create a table while you submit me your report one column - feedback, another column how you addressed it. (In the comments section)	40
Aug 10, 2023	Submission 2	Hello Piyush, Thanks for your efforts on this. I would say it's better but needs quite a lot more to pass Dr. Lingras. He is strict so trying to guide you before. 1. Tools don't need to be bold. 2. Add one line space after heading "List of Tables" 3. Also, in between you have names, tools etc bold and black, it's not required and throws the reader a bit off, can you undo that. You can keep headings bold but works in between sentences don't need same treatment. 4. Formatting is off, make it even and all same size. (Screenshot attached) data preprocessing —> data pre-processing 5. Website and contact can go to appendix. 6. The timeline table needs to be uniform - remove colour scheming, bold etc. Not required, keep it simple and smart. 7. You need to increase table size - see samples I sent you and their table - formatting is off- Dr. Lingras will reject the report right away if he sees this. This is sloppy. (Screenshot attached) 8. Now, coming to description part - you did work on content like follows (screenshot attached) to be elaborative: But the writing is poor. I can guarantee Dr. Lingras won't pass this. It feels like same sentence is twisted and written again: John and Shawn are brothers, Shawn and John are brothers, John is a brother of Shawn and so on. I am again attaching sample of report and see what were already sent through. Those reports have passed review, can we get your report to similar standards. I have a strong feeling Dr. Lingras will reject it. Cover letter: Did you make use of ChatGPT and Grammarly? add that. Send me rough logs file too. If you need a call with me, email me and let's connect over zoom.	38

Aug 7, 2023	Submission 1	Hello Piyush, Thank you for the report. The structure, formatting, size everything looks great but unfortunately the chronological time will need some rework. I have a strong feeling that the report won't pass supervisor submission as the chronological timeline needs more details. Leaving Chronological timeline, please make sure the size of all other sub text is 12 (headings -20). Also, give a spacing of 1.5 throughout the report leaving chronological timeline. Software and hardware tools are pretty basic and don't need descriptions, please just name the tools and descriptions are not required. Chronological timeline tasks like one on page 18 with 20 hours needs a LOT more details. You need to justify the hours spent in the internship. Add a challenges and future work section. Add references + glossary section. I am sure there will be some references. I am sending you a sample report to see the how the tasks are well written in the chronological timeline. That's the level of description expected in the internship reports. I am confident Dr. Lingras won't pass the current timeline and will ask for more details. Hence, I am pointing that out in advance. Also, do send me a cover letter and log file in next submission. After all these changes: Write a detailed description on all my points about how you addressed all my feedback, create a table while you submit me your report one column - feedback, another column how you addressed it. (In the comments section)	35
