Subject: Submission of Project Report for Internship at Citco Technology Management

Respected Sir/Ma'am,

I am pleased to submit my project report for my tenure at Citco Technology Management, which spanned from March 15, 2026 to August 31, 2026. This internship corresponds to the requirements for the MCDA 5585 and MCDA 5586 courses. During this period, I completed a total of 900 hours. An additional 120 hours were dedicated to composing this report, bringing the total hours for this submission to 1020 hours.

Included in this submission are:

1. Cover Letter
2. Major Project Report – in both Word and PDF formats
3. Logs of activities – provided in Excel and PDF formats

The attached timesheet details the weekly breakdown of activities. For the preparation of this report, I used tools such as Grammarly for grammar checks, Claude for assistance in structuring complex sentences, and LaTeX and Microsoft Word for document formatting.

Thank you for considering this report as part of my program requirements. I look forward to your feedback and any further requirements needed for the completion of this process.

Sincerely,

Bhavik Kantilal Bhagat

Master of Science in Computing and Data Analytics,

Saint Mary's University

Appendix

Mentor Feedback:

Date	Score	Feedback
Sep 26, 2026	78%	• In the cover letter, there is no need to include sections for Supervisor Feedback or Committee Feedback at this stage. These sections can be added later once the respective feedback has been provided. • In the Status of Goals Overview table, please use “Completed” instead of check marks and highlight the corresponding cells in green. Refer to the sample report for formatting. • Move “Production incidents provided valuable learning experiences:” to page 130 so that the heading and its corresponding text begin on the same page. Please ensure this is consistent throughout the report. • The Appendix should begin on a new page. • Please mention the use of ChatGPT or any other LLM/AI tools in both the References section and the cover letter. • Please use appropriate prefixes (Mr. or Ms.) for all individuals mentioned by name in the work logs as well.
Aug 31, 2026	55%	• On the Cover Page, the font size used for the course number, A-number, and other details should match the formatting shown in the sample report. • Please use appropriate prefixes, such as Mr. or Ms., for all individuals mentioned by name throughout the report. • The content and structure of the Certificate should follow the sample report exactly. • Please remove these unnecessary headers from the report.

Date	Score	Feedback (cont.)
		• In the Table of Contents, the font color should be black, and only headings and subheadings up to the second level should be included.
		• The List of Figures and List of Tables should be numbered starting from 1, following the format used in the sample reports.
		• Page numbers should be black or grey. Red should be reserved only for titles and labels.
		• There is excessive blank space on page 7. Please move the next section up to utilize the available space. Review the entire report and correct any other similar instances.
		• The JIRA ticket numbers do not provide meaningful context in the report, as they refer to items that are not defined or explained for the reader. Please remove them.
		• Please move “Three insights from the elicitation process materially shaped the resulting design:” to the next page so that the heading and its corresponding text begin on the same page. Please review the entire report for similar instances and correct them consistently.
		• Regarding Section 8.3, tables should be placed within the same section where they are discussed or referenced. Creating a separate subsection containing only one line that refers to a table located elsewhere makes the report appear unstructured.
		• Please avoid creating separate subsections for only one or two lines of content. Where appropriate, combine short subsections with related sections to improve the overall flow and organization.

Date	Score	Feedback (cont.)
		• The Implementation section needs to be completely revised. This section should describe what you personally worked on and implemented during the project, rather than explaining how the overall product or project is structured. Please use first-person language such as <i>"I worked on..."</i>, <i>"I developed..."</i>, <i>"I implemented..."</i>, <i>"I configured..."</i> and <i>"I added..."</i> • The Weekly Implementation section needs significant expansion. Each week should contain approximately one full page of detailed content describing the work completed. A single paragraph for an entire week is not sufficient. • The Learning Goals table should be restructured to include a clear description of each learning goal, in addition to the other required information. Please refer to the sample report for the expected format. • In the Work Logs, some of the later weeks contain tasks of approximately seven hours that are summarized in only one or two lines. Please break down any task lasting more than four hours into smaller, realistic time blocks and provide a more detailed description of the work completed during each block.
